- 6 Profile
- 7 Message

## Onboard

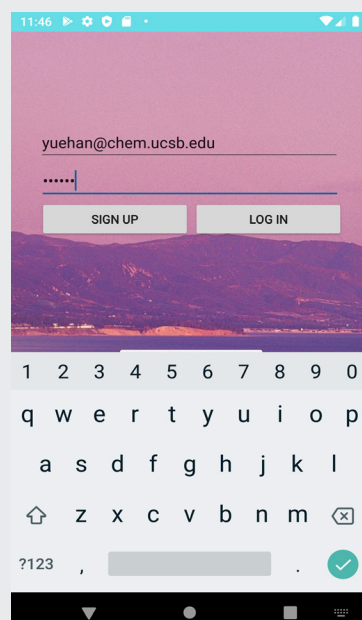

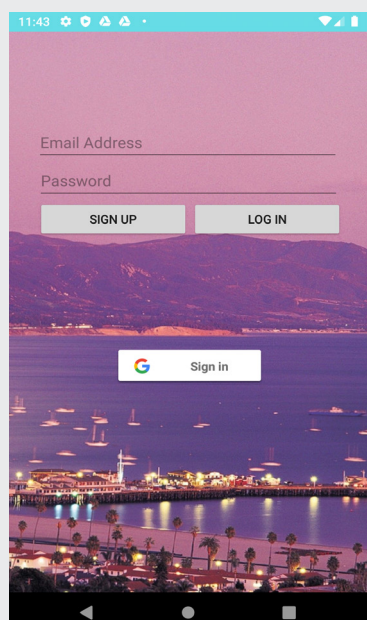

After you open the app on your Android system-based phone, tap "START" to continue.

## Sign Up/Log In

If this is your first time using the app, please tap "SIGN UP" after providing your email address and password. After you have successfully created your account, you will be asked to provide additional information to complete your profile.

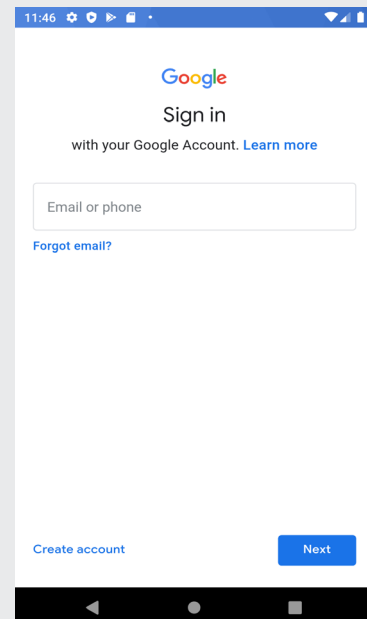

If you already have an account, please tap "LOG IN" after filling in the email address and password combination

## Google Sign in

---

Alternatively, you may also use our Google authentication feature as a means for signing up and logging in. Doing so will ask you to sign in using your Google Account.

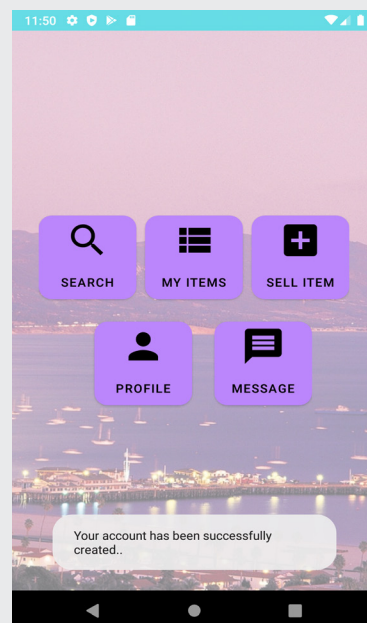

## Home Page

---

After successfully logging in or signing up, you will be redirected to the main page, which provides buttons that serve the purpose of helping the user navigate across the five main features of the app, which are:

- 1) Search
- 2) My Items
- 3) Sell Item
- 4) Profile
- 5) Message

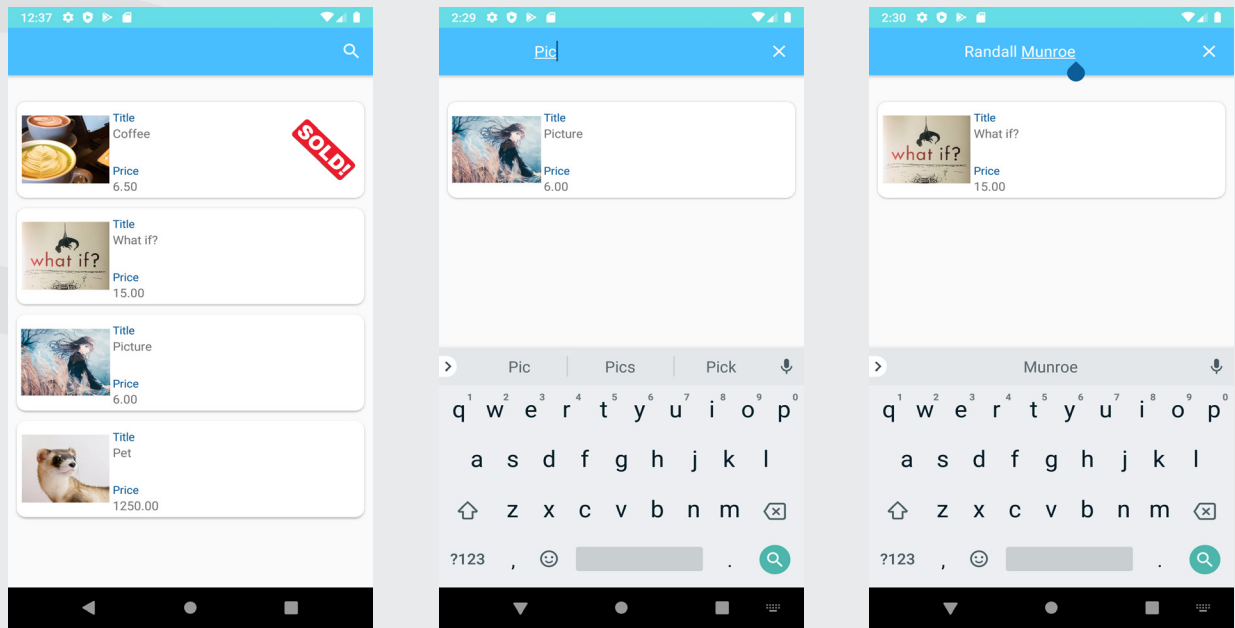

Those features are all further explained in the later sections.

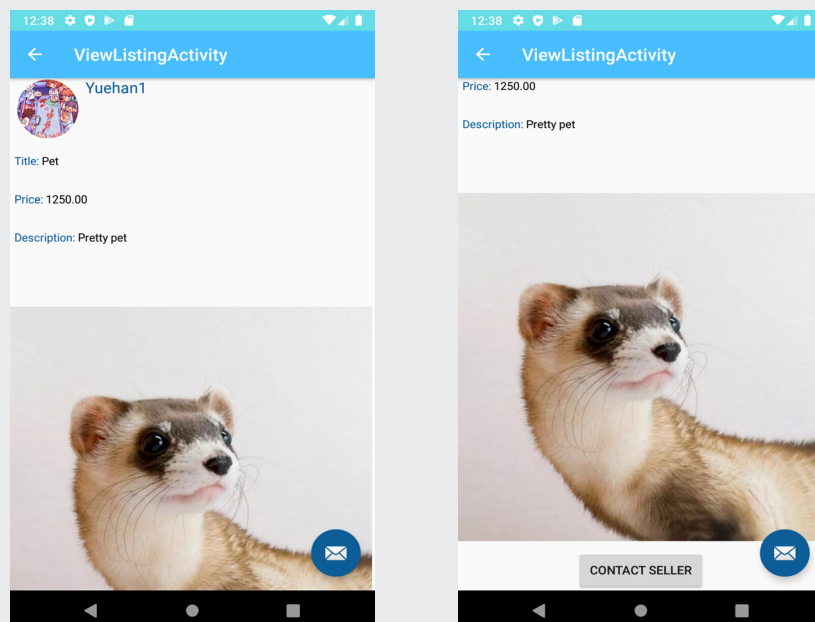

HOME PAGE

## Search Page

If you are looking for a specific product to buy, you can tap on the “SEARCH” button. You can also see the list of all the products being sold by other users. To search products by keywords, tap on the magnifying glass icon on the top of the toolbar. Product listings will be updated instantaneously as you continue to type into the search bar.

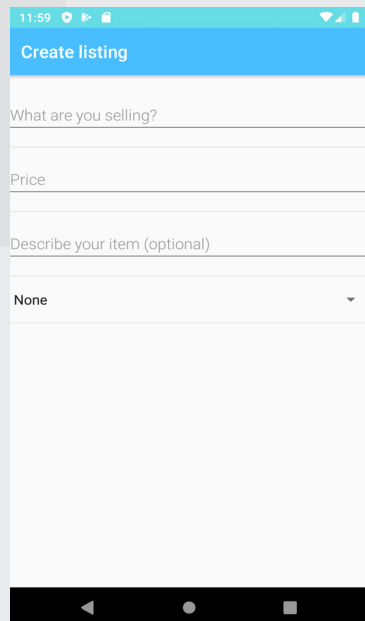

If you would like to view a specific product, tap on the listing, and it will display a more detailed description of the listing. In addition, you can tap on the “CONTACT SELLER” button to message the seller directly via Gauchoshare. (Note: The products marked “SOLD!” can no longer be viewed)

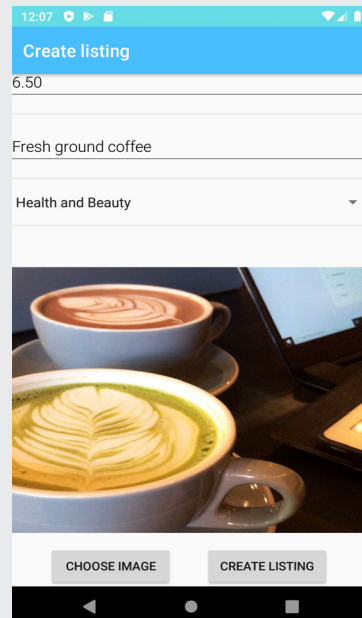

SEARCH

## SELL ITEM

Navigating to the “SELL ITEM” section will redirect you to a form, asking you to fill in some information regarding the product you wish to sell (e.g. name of product, price, description, and category). Additionally, you can also upload an image of your product by clicking on the “CHOOSE IMAGE” button. Once you are finished, tap the “CREATE LISTING” button to make your listing viewable to other users. (Note: The listing title, price, and category are all REQUIRED fields you must fill out)

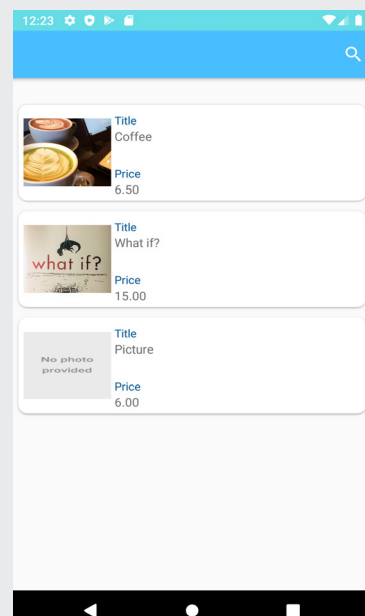

The screenshot shows the 'Create listing' form on a mobile app. The form has a blue header with the text 'Create listing'. Below the header, there are four input fields: 'What are you selling?', 'Price', 'Describe your item (optional)', and a dropdown menu currently set to 'None'. The form is displayed on a white background with a black navigation bar at the bottom.

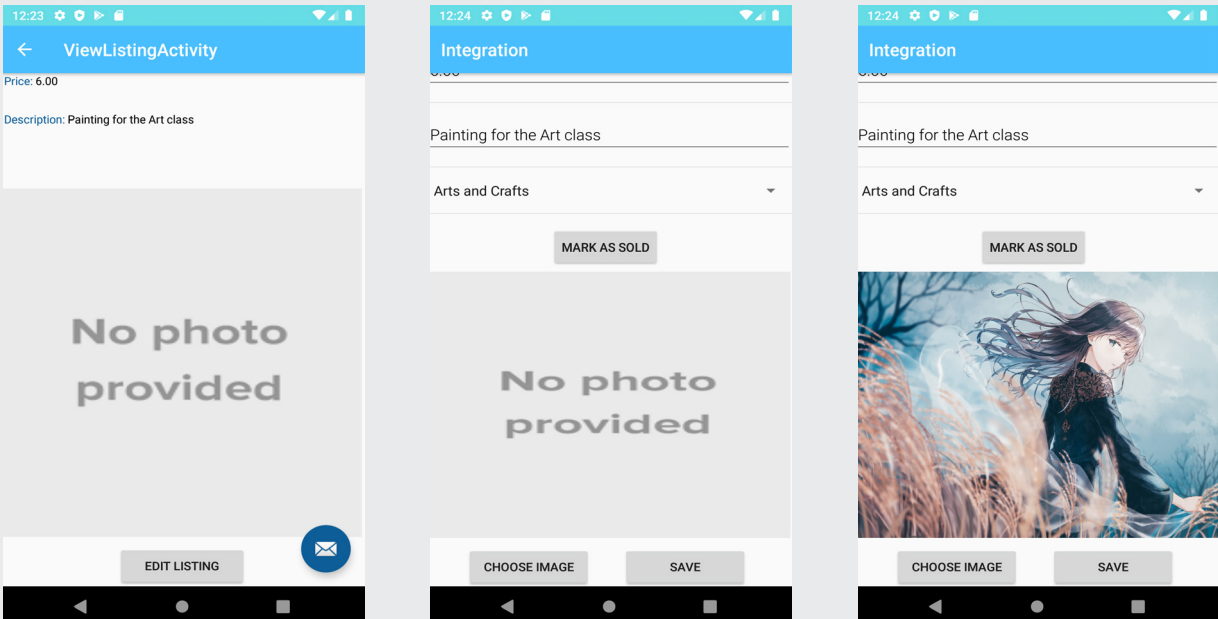

The screenshot shows the 'Create listing' form with filled-in data. The 'What are you selling?' field contains 'Fresh ground coffee', the 'Price' field contains '6.50', and the category dropdown is set to 'Health and Beauty'. Below the form, there is a photo of two cups of coffee. At the bottom, there are two buttons: 'CHOOSE IMAGE' and 'CREATE LISTING'.

## My Items page

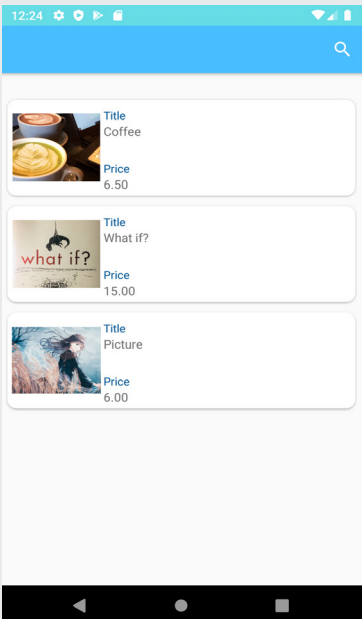

If you wish to view all the listings you have created, navigate to the “MY ITEMS” feature on the home page.

If you wish to edit an unsold product, tap on the listing you are advertising the product under, and tap on the “EDIT LISTING” button.  
Here, the user is adding an image to an already created listing by tapping on the “EDIT LISTING” button and then selecting an image by tapping on the “CHOOSE IMAGE” button.

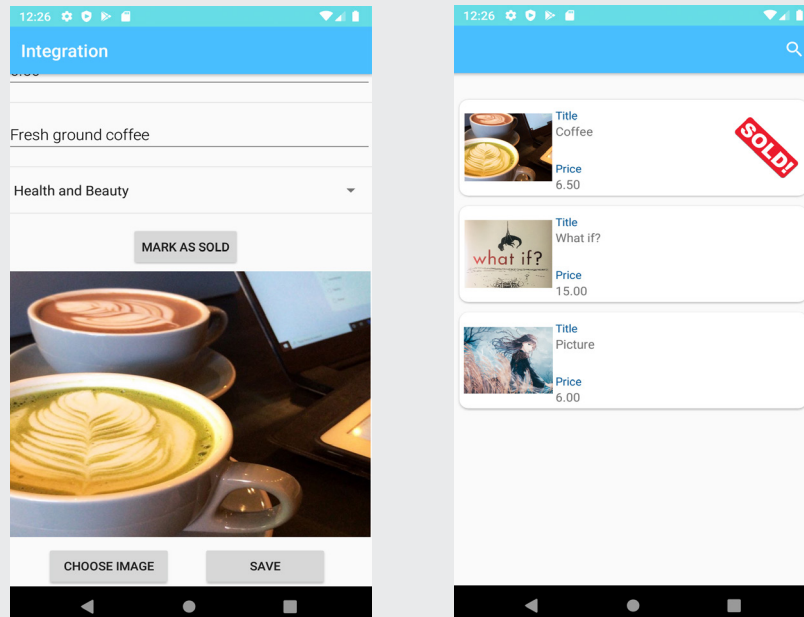

Once you have made the desired changes, tap on the “SAVE” button to save your changes. Navigate back to the “MY ITEMS” feature in order to see the changes you have made.

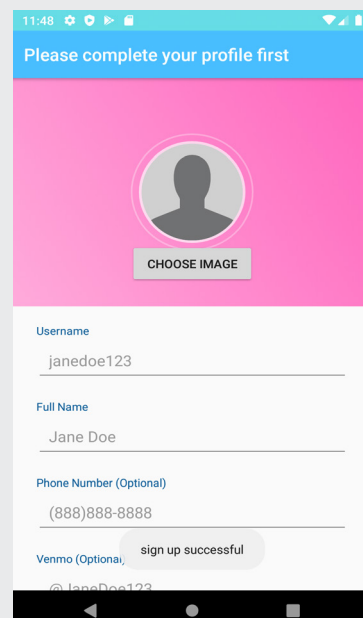

MY ITEMS

Furthermore, you may mark a listing as “sold” with the button “MARK AS SOLD” in order to let other users know that the product your listing is advertising is no longer available. Listings marked as “SOLD” will no longer be viewable by other users in order to prevent other users from messaging you about an outdated listing.

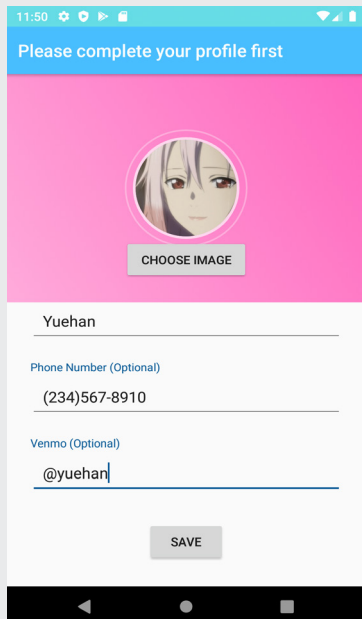

## Complete Your Profile

After you sign up, you will be redirected to the profile setup activity, which will ask you to provide some required information, which include a username and full name, as well as a phone number, Venmo link, and profile picture, which are all optional and up to your discretion.

SAVE

After you have finished completing your profile, tap on the “SAVE” button to finish the profile setup process.

## Profile Page

If you wish to view or edit your profile information, navigate to the “PROFILE” feature. Here, you can see how others will view your public profile. You may also edit your currently displayed profile information by tapping on the “EDIT PROFILE” button. Tapping “CANCEL” will discard any changes you might have made, and tapping the “SAVE” button will update your profile with any changes you might have made.

## Message

In the Message feature, you are presented with the following user interfaces, composed of two fragments, which are the chat fragment and the user fragment. The chat fragment displays a list of all the previous chats that have occurred between you and other users of the app. You can also see the last message that was sent by either person per conversation. The user fragment displays a list of all the users of the app. There is a search bar in this fragment, so that you may search for other users to message.

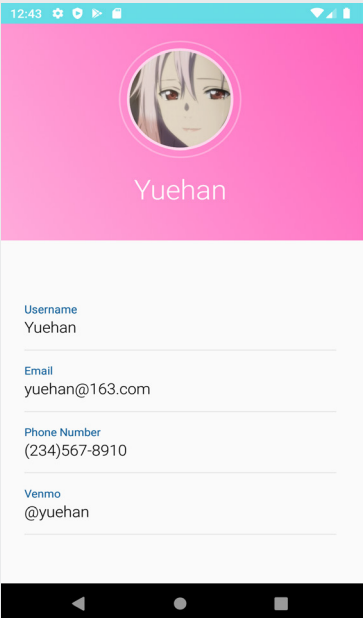

When one of the users is tapped, it will open up your previous messages with the other user.

MESSAGE

If you want to see the other user's information, you can tap on the toolbar to take you to their profile.
